- FDNT 235 Nutrition (3)
- HLED 162 Fitness for Life (2)
- HLED 166 Health Education (2)

Take at least two courses from the following: 2

- ESAC Exercise Science Activity Courses (1)

**Domain 5: Electives & Other Requirements**

Take additional electives as needed to meet the minimum requirement of 96 transferable quarter hours.

The following courses are recommended:

- ACCT 121 Financial Accounting I 3

PLEASE NOTE that C minus (C-) grades are not transferable for credit to Loma Linda University

**Health Sciences, A.S.**

Pacific Union College offers an A.S. degree with a major in Health Sciences. This major can be taken in conjunction with the pre-health information administration requirements. For more information, see page NHSC-03 or contact the Health Sciences advisor in the Nursing and Health Sciences Department.

\* This course is remedial and will not count for credit.

**Occupational Information**

**What can I do with this profession?**

The Health Information Administrator (HIA) manages health information systems that serve the needs of patients, the health-care team, and the administrative staff. It is an excellent career choice for the person who would like to have a profession in healthcare that combines interests in data analytics, computer science, business, management, informatics, law, and medicine. This unique mixture provides the HIA with great opportunities in a variety of different settings and job titles along with substantial income.

**Professional Training?**

Preparation for a career as a health information administrator usually lasts four years and leads to a bachelor’s degree. Concentration in health information administration starts in the third year. Loma Linda University is the only accredited school within the denominational school system and within the five western states of California, Nevada, Arizona, Oregon and Hawaii to offer this program.

**Job Outlook**

Job opportunities continue to grow for HIAs. According to the Bureau of Labor Statistics, “employment of health information technicians is projected to grow 22 percent from 2014 to 2022, much faster than the average for all occupations.” As the population ages, they will require more care. More care translates to more documentation required and reimbursement for healthcare providers. “Additional records, coupled with widespread use of electronic health records (EHRs) by all types of healthcare providers, could lead to an increased need for technicians to organize and manage the associated information in all areas of the healthcare industry” (www.bls.gov).

The job market is rapidly expanding outside of hospitals. New openings are available in home health agencies, long term care facilities, outpatient care, mental health facilities, private medical practices and clinics, insurance companies, health management organizations, commercial and industrial firms, governmental agencies, legal offices, software vendors, and education.
