Health Sciences, A.S.

Pacific Union College offers an A.S. degree with a major in Health Sciences. This major can be taken in conjunction with the pre-clinical laboratory science requirements. For more information, see page NHSC-03 or contact the Health Sciences advisor in the Nursing and Health Sciences Department.

Occupational Information

General Areas of Service

The clinical laboratory scientist supervises or performs laboratory tests that aid the physician in the diagnosis and treatment of the patient’s disease. Often, these tests—in clinical chemistry, medical microbiology, parasitology, serology, hematology, immunology, bloodbanking, clinical microscopy, nuclear medicine, and other analyses—may disclose subtle changes that might not be detected in any other way. The majority of medical technologists find work in Clinical Laboratories, research industry, or public health agencies in this country and abroad.

Professional Training

The B.S. degree prepares the graduate for licensure examinations administered by the State of California Department of Health and the American Society of Clinical Pathologists.

Denominational Service

Adventist hospitals and the worldwide mission work need medical technologists.

Job Outlook

Good. Hospitals, private laboratories, and government agencies offer opportunities for employment. Nationally and in California the job outlook now appears bright.

Earnings

Starting salaries in California range from \$54,000-\$75,000 per year, higher for experience and/or advanced training.
