Student Learning Outcomes

Students can:

- **Make Music** effectively in solo and group settings, when conducting an ensemble, and through the creative use of technology.
- **Create Music** via composition, editing and synthesis, and improvisation, as well as orchestration and arranging.
- **Understand and Communicate About Music** through a deeper understanding of music theory, history, and ethnomusicology and the development of articulate oral and written skills.
- **Teach Music** to people of all ages to make music in solo and ensemble settings

Occupational Information

The B.S. in Music: Music and Learning Emphasis at PUC's Department of Music seeks to nurture and develop a student's musical talent and teaching skills in a creative Christian environment. In this degree, students study ways to effectively teach music to any age group, whether toddlers, elementary and high school students, working adults, students with special needs, or retirees. Students are expected to develop solid performance skills in solo and group settings as well as the ability to talk and write about music effectively. In addition, students explore entrepreneurial ways to create a teaching and performing career.

Those who are particularly entrepreneurial and with mastery in their performance area are able to create careers for themselves as teachers and performers without attending graduate school. If a student wants to teach in the K-12 system in California, they should contact PUC's Department of Education to explore credentialing requirements for teaching music in the school system. This can be done during a fifth year on the undergraduate level or while receiving a terminal master's degree.

This degree provides a liberal arts education with a focus on creative problem solving and the ability to work effectively as an individual and as a team member. This degree is an excellent background for careers in music business and industry, and well as a fine degree to use in preparation for graduate school in areas such as Music Education, Music Therapy, and Speech Pathology.
