# **Pacific Union College**

**Major in Mathematics, B.A.** 

# **Major Course Requirements**

A minimum of 51 hours (at least 8 upper-division hours)

> Required Core Courses (38 hours):				
MATH 131+132	Calculus I, II	4+4		
MATH 265	Elementary Linear Algebra	4		
MATH 267	Multivariable Calculus	5		
MATH 269	Elementary Differential Equations	4		
MATH 275	Logic and Sets	4		
MATH 385	Mathematical Modeling	4		
MATH 451	History of Mathematics	4		
SCIE 290	Sophomore Seminar	1		
STAT 222	Introduction to Statistics	4		
► Required Core Electives (9 hours):		9		

> Required Core Electives (9 hours):

At least 9 hours additional MATH, STAT, DTSC courses or INFS 146, INFS 240, INFS 340

> Required Cognate Courses (4 hours):

**INFS 115** Intro to Computer Programming

All core and cognate courses should be chosen in consultation with the major advisor. Students should consider the recommendations described below:

#### **Applied Mathematics**

MATH 462 & 462L, STAT 322 and INFS 470. Students interested in applied mathematics should earn a minor in an applied field. Consult with your advisor for choices.

Mathematics Education MATH 341, 350, 451, & PHYS 111.

Actuarial Certification STAT 322 and INFS 470.

#### **Student Learning Outcomes**

#### Students can:

4

- Demonstrate proficiency in the basic mathematics and problem solving skills of the standard core of undergraduate mathematics.
- Apply mathematical principles to new situations, within mathematics as well as in other settings.
- Communicate mathematics in written and oral form to peers as well as to people with less mathematical background.
- Display familiarity with various technologies commonly used for mathematical investigations.

# **Occupational Information**

#### What can I do with this major?

A focus on Applied Mathematics or Statistics can lead to mathematics-related careers in medicine, government, business, and industry. Graduate study opportunities can lead to specialties in actuarial science, operations research, and applied statistics (A minor is highly recommended. Consult with your advisor for choices).

A focus on Mathematics Education will lead to a California Teaching Credential in secondary school mathematics. The mathematics portion of the California Subject Exam for Teachers (CSET) is usually taken during the senior year. (Students who wish to complete their secondary teaching credential at PUC should consult the Credential Analyst in the Education Department).

Actuarial Certification: Actuaries help businesses assess the risk of certain events occurring and to formulate policies that minimize the cost of that risk. Using their broad knowledge of statistics, finance, and business, actuaries help design insurance policies, pension plans, and other financial strategies. (Students with interest in the national exams for actuarial certification should confer with departmental faculty.)

#### **Public Sector vs. Denominational**

Non-teaching jobs are most available in the public sector. There is a strong demand for math teachers in Adventist academies.

## **Job Outlook**

In addition to high school teaching, there are many opportunities for mathematics-related careers in medicine, government, business, and industry.

**Major in Mathematics, B.A.** 

#### **General Education Requirements**

To view general education requirements for this major, please refer to page A-02, Summary of General Education Requirements: B.A. Degree.

## **How to Construct Your Own Program**

- 1. Counsel with your advisor.
- 2. Consider your aptitudes, interests, and available courses.
- 3. Schedule major courses and cognates first.
- 4. Fill the rest of your schedule with G.E. requirements.
- 5. For the freshman year include English, Religion, and PE courses. Also include Basic Algebra I+II unless waived by previous work.

## What the Degree Includes

A total of 192 quarter hours including:

- 1. A minimum of 60 upper division hours.
- 2. General Education requirements.
- 3. Major requirements.
- 4. Minimum 2.0 GPA, overall and major.

# **Teaching Credential**

Students desiring to enter a program of studies leading to a California teaching credential in mathematics should take the B.A. degree in Mathematics and complete the recommended courses for the Mathematics Education focus. For more information, please consult the Secondary Teaching Credential as outlined on page EDUC-06.

## **For More Information**

Mathematics and Physics Department Pacific Union College One Angwin Avenue Angwin, CA 94508 (707) 965-7269

Website: www.puc.edu/mathematics

## **Sample Four-Year Program**

This sample curriculum is designed to show you how a program may be constructed and to help you select a proper sequence of courses in the major. It is not likely that these courses can always be taken in the order given. Your advisor will help you design a personalized program of studies.

First Year	F	W	S
Essential Algebra & Trig for Scientists	2	-	-
Introduction to Statistics	-	-	4
Calculus I,II	-	4	4
College English I,II	4	4	-
Religion Courses	3	3	3
General Education/Electives	7	5	5
	16	16	16
Second Year	F	w	S
Elementary Differential Equations	4	-	-
Logic and Sets	-	-	4
Multivariable Calculus	-	-	5
Sophomore Seminar	-	1	-
Intro to Computer Programming	-	-	4
Religion Courses	-	3	-
General Education/Electives		12.5	3
	16	16.5	16
Third and Fourth Years	F	w	S
Elementary Linear Algebra	-	4	-
Overview of Real Analysis (odd)*	4	-	-
Geometries (odd)*	-	-	4
Overview of Abstract Algebra (even)*	4	-	-
History of Mathematics (even)*	-	4	-
Mathematical Modeling (even)*	-	-	4
Upper-Division Major Electives	5	4	4
Upper-Division Religion Courses	3	3	3
Senior Assessment Seminar		-	0.2
General Education/Electives	20	21	14
	36	35	29.2

<sup>\*</sup> Courses marked (even) or (odd) are taught in alternate years only. 2025-2026 is even, 2026-2027 is odd.
