

Looking for a Major?

It is not unusual for students to come to college prior to selecting a major. Undeclared students are encouraged to begin fulfilling requirements in General Education (G.E.) while also exploring areas of interest for potential majors. In many cases these courses of interest may also fulfill G.E. requirements.

Students should become well acquainted with the contents of the General Catalog, particularly with the section entitled “The Academic Program” which explains the General Education program in detail.

The Teaching and Learning Center (TLC), the Career and Counseling Center and the student’s academic advisor are ready to provide assistance in the selection of a major.

Career choice involves...

1. Self-awareness
Work with your Academic Advisor and Career Counselor to learn more about yourself and explore:

Strengths	Culture
Values	Passions
Goals	Personality

2. Occupational awareness
Evaluate your career interests and plan for the future by researching:
 - Academic Degree Requirements
 - Job Availability
 - Work-Life Balance
 - Salary & Advancement Opportunities

3. Enrollment in introductory courses to explore course work in areas of potential majors.
See the back of this sheet for a list of potential introductory courses.

For More Information

The Student Success Center offers academic advising for undeclared students and academic support services.
